MAURO PERUCCHETTI

Perucchetti is a sculptor best known for his brightly coloured resin objects. The artist's smooth, translucent sculptures take on a multitude of shapes, including the Jelly Baby, dollar bills, heart-shaped grenades, flying pigs, pill capsules and skulls.

"In a world where so much effort and money goes in to creating custom made fashion pets and accessories, we have perhaps become too remote from the treasures of real nature and should consider all wildlife with the same love and respect that we reserve for our pets."

MAURO PERUCCHETTI

GOING, GOING, GONE

GUIDE PRICE: £30,000
